

GLASS TAPER TUBE TYPE FLOWMETER GTF SERIES

The main parts quality of the material is METAL.

The glass tube type flowmeter GTF measures Instantaneous flow rates of liquids and gases in a vertical pipe line. This direct reading type flowmeter has a simple construction making for easy maintenance.

◆ SPECIFICATION (METAL TYPE)

Connection sizes	10A to 80A (3/8 " to 3")
Fluids	Liquids and Gases
Range ability	1 : 10 (10 ~ 100 %)
Accuracy	Within ± 2 % F.S.
Max. working pressure	Refer to "SCALE RANGE "
Working temperature	0 ~ +100 °C : Metal Float
	0 ~ +70 °C : PTFE Float
Materials	SUS304 (Standard) SUS316, Lining (Option)
Connection rating	ANSI, JPI, JIS FLANGE SCREW
Mount position	Bottom to Top

◆ MODEL DESCRIPTION

G T F - □ □ □ □ □ □ □ □		CONTENTS	
STRUCTURE	1		FLOAT GUIDE NOTHING
	2		WITH FLOAT GUIDE
FLOW DIRECTION			BOTTOM TO TOP Standard goods: No sign
	L		BOTTOM TO TOP SIDE / BOTTOM SIDE TO TOP
	P		BOTTOM SIDE TO TOP SIDE
OPTION	AR 1		The one-point alarm of a reed switch
	AR 2		The two-point alarm of a reed switch
	AP 1		The one-point alarm of an optical sensor
	AP 2		The two-point alarm of an optical sensor
	AX 1		Intrinsically Safe Explosion one-point alarm of a reed switch
	S		Screw connection
	N 1		Flowing quantity adjustment valve with the upstream side
	N 2		Flowing quantity adjustment valve with the downstream side
	CP		Protection cover Transparent PVC
	CA		Protection cover Transparent Acrylics
	CU		Protection cover Stainless Steel
	CS		Protection cover steel
	C 1		Oil free (Fat free)
	C 2		Oil free
	Z		Other Special specification

WARNING

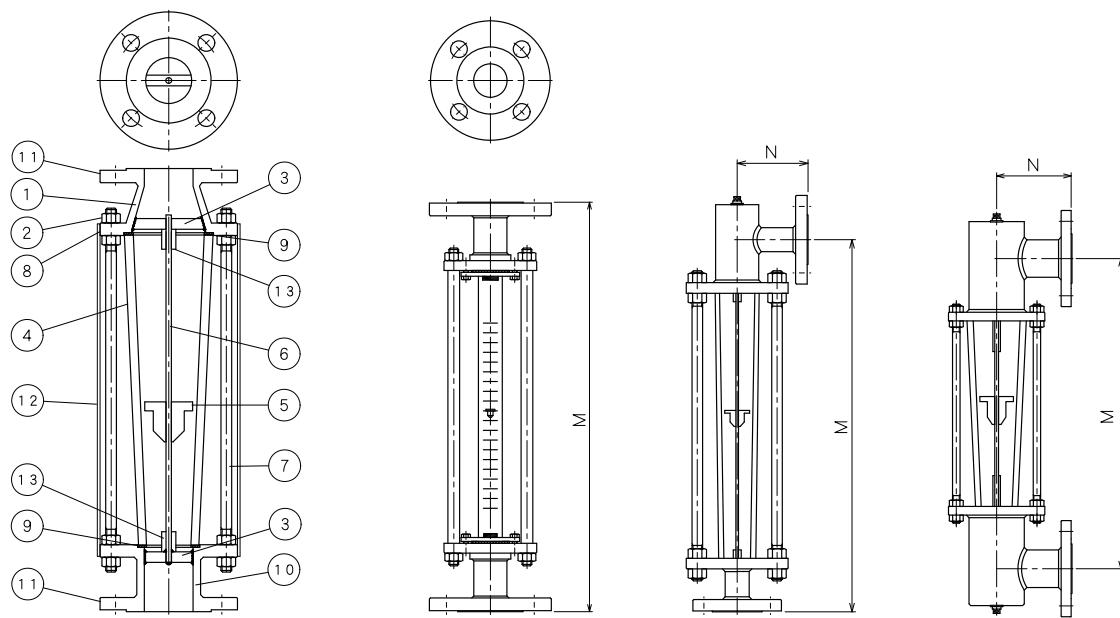

The maximum working pressure and temperature of this flowmeter
Be sure to use the flowmeter within these conditions otherwise the glass tube may be broken.
If this condition is not kept, harm will join a human body.

- The pressure retaining part is made of glass. Rough handling may cause serious accident.
- It is recommended to install a solenoid valve at the outlet of the flowmeter.

1. Standard articles are NO.1 and NO.3. The other quality of the materials serve as order-received production.
2. Quality of the material NO.2 become the size more than 50A.
3. It may be unable to specify with [of (6)] a float guide according to flowrate specification and the quality of the material. Moreover, those without a float guide may be unable to be specified. Please refer to a 4-page flowrate table for details.
4. Please ask the details which I manufacture also except the quality of the material of a publication.
5. A pressure display is gauge pressure. $1\text{atm} = 101.33 \text{kPa}(\text{abs}) = 0 \text{kPa}(\text{G}) = 0 \text{MPa}(\text{G})$
6. Quality of the material (2)(7)(12) does not touch liquid, or does not touch gas.
7. A figure may differ from structure form in specification. The float quality of the material may use glass, a ruby, PVC, PTFE, etc. with specification.
8. Although the quality of the material of float and a float guide is writing it as SUS304, SUS316 may be used by the thing.
9. Outlet, Inlet, and Flange are called Main parts in this book.
10. Please select a setup of Flowrate scale range from a 4-page table. Please select the maximum of Flowrate scale in that case from a 20-page table.

- Standards are quality of the material NO.3
- Quality of the material NO.2 become the size more than 50A.

! WARNING

The maximum working pressure and temperature of this flowmeter are 0.2 ~ 0.5 MPaG (2 ~5 kgf/cm² G) and 0~40 °C.

Be sure to use the flowmeter within these conditions otherwise the acryl tube may be broken. If this condition is not kept, harm will join a human body.

- The pressure retaining part is made of acryl. Rough handling may cause serious accident.
- Keep in mind that taper tube will be damaged if a solvent is poured or a solvent is made to adhere to taper tube.
